

## Michigan: County-by-County MFP Rates

Assistance through USDA's Market Facilitation Program is based on a single county payment rate multiplied by a farm's total plantings of MFP-eligible crops in aggregate in 2019. Those per-acre payments are not dependent on which of those crops are planted in 2019.

A producer's total payment-eligible plantings cannot exceed total 2018 plantings. County payment rates for Michigan ranged from the \$15 minimum for many northern counties to a maximum of \$68 per acre for Macomb County, depending on the impact of unjustified trade retaliation in that county.

For more information on MFP, including rates for specialty crops, nuts, dairy (milk) and hogs, visit <http://www.farmers.gov/mfp>
